President-Elect Donald Trump
Trump Tower
725 Fifth Ave.
NY, NY 10022

Dear President-Elect Trump:

Thank you so much for your fine services to America, and for accepting my many Thousands of Dollars of donations to your campaign.

Please spend a couple hours educating yourself about the Magnesium-in-Water issue, which the NAS said back in 1977 is costing about 150,000 deaths per annum in the US. See: <http://www.mgwater.com/exhibitb.shtml>

Famous Magnesium Researchers Dr. Burton Altura and Dr. Bella Altura, whose research my Foundation has partially funded for years at \$3000 per month, got the UN's World Health Organization to publish their paper recommending that ALL drinking water on earth contain at least 25 mg of Magnesium per liter:

http://www.who.int/water_sanitation_health/publications/publication_9789241563550/en/

Another researcher has calculated the Global deaths from Mg-deficient water to be 4.5 Million deaths per annum:

http://www.mgwater.com/rosanoff_high_heart_health_value_of_drinking_water_magnesium2013.pdf

One inexpensive solution is to add Mg to bottled beverages and to tap water (as Israel is beginning to do at my urging). An additional solution is to reverse the FDA's action in 1930 when it villainized the operation of mineral springs or mineral spas in the United States, destroying the American mineral water industry to this day.

If you do the math, you can see that from 1930 to 2016 is 86 years, which given the NAS's estimate of 150,000 deaths per annum, works out to 12,900,000 deaths caused by the FDA's blunder. That's almost twice the Holocaust.

Obviously, the FDA does not want to hear a word about magnesium, or admit their blunder, and prefers to just let the deaths continue on with no one taking the blame.

I had to reach out to Canada to get a copy of the NAS's 1977 paper estimating 150,000 US deaths per annum, as I had a difficult time tracking down this important report in the USA. I think you are the perfect person to address this issue, to save 150,000 American lives per annum.

Sincerely,

Paul Mason
